

Technical Features

- ©Taking use of super-high frequency and mini-power interference technology. high efficiency.
- ©Effectively making subsections. just interfering downlink and no interception on the base station.
- ©Extreme portability. the weight for machine itself and antenna is just 150g.
- ©Low power consumption. Working time for machine is about 2-3 hours. Supplied power by battery.
- ©Slow start up design of circuit. These elements can maintain the stable operation condition with high integration.

Portable GSM CDMA GPS Jammer

Type	Output port	Frequency	Semidiameter of interception
A	CDMA	870-880 MHz	0.5-15 M
	GSM	935-960 MHz	
	GPS	1450-1600 MHz	
B	GSM/CDMA	869-960 MHz	0.5-12 M
	DCS/PHS	1805-1920 MHz	
	3G	2110-2270 MHz	
Power supply:AC220V-DC5V; Bulit-in Battery:1500mA/h			
Energy Consumption:0.5W/h			
weight: 150g			
Dimension: (L*W*H):95*45*18m			

Notices

- ©Be sure to connect all the antenna first before the power supply is switch on. Please do not take off antenna when the machine is working.
- ©Antenna shall be used vertical to the ground. working more efficiently.
- ©Please don't put the jammer in the water and fire to avoid using in the bad. Condition of over-wet. over-hot, high voltage and high magnetism.
- ©If the jammer can not be charged or other unconventionality(i.e. The indicator light doesn't light up). please contact with the distributor in local place. Any refit and incorrect repair is not allowed.
- ©Any ruin and disrepair caused by incorrect operation and disassembly will be excluded from the repair with free of charge.
